**«Emerging Trends in Pharmaceutical
Sciences – Recent Academic Appointments
in Switzerland»**

Welcome

The SWISS PHARMA SCIENCE DAY (SPhSD) is an annual event of the Swiss Academy of Pharmaceutical Sciences (SAPhS, www.saphw.ch). It offers a unique platform for scientists in the field of pharmaceutical sciences to meet, interact and learn.

The 18th SPhSD is placed under the theme of «*Emerging Trends in Pharmaceutical Sciences – Recent Academic Appointments in Switzerland*». Seven recently appointed colleagues from the universities of Basel, Bern and Geneva, and ETH Zurich will address pharmaceutical sciences from the perspective of their respective disciplines. As in previous years, MSc and PhD students, and post-doctoral scientists will have the opportunity to present their latest research in a poster session, and three abstracts will be selected for short oral presentations. The scientific part will be followed by the award ceremony and the traditional apéro.

One of the primary goals of the SPhSD is to promote professional and social contacts between students, postdocs and established scientists in academia, industry, hospitals, public health administration, and public pharmacies. For students and young scientists the SPhSD offers a unique platform for learning about opportunities and career paths in various professional fields. Established scientists can meet young scientists who may be recruited for a position in their organisation.

We look forward to seeing you all in Bern!
